

— Tech Tip —

Correcting the Thumbnail/Caption Mismatch in the InterWrite Picture Gallery

When the captions do not match the thumbnails of the images in your InterWrite Picture Gallery, please take the following steps to correct the problem.

- 1 Close InterWrite **Interactive Mode**.
- 2 Open the InterWrite install folder and navigate to **Gallery**. Typically, it is located in **C:\Program Files\GTCO CalComp InterWrite\Gallery**.
- 3 Delete *MainGallmgList.MGI*.
- 4 Restart InterWrite in Interactive Mode.

The InterWrite Picture Gallery will be rebuilt when you start InterWrite in Interactive Mode. (This could take several minutes.) The Thumbnail captions should now match the images.
