## INTERWRITE MEETING SUITE ►

The InterWrite Meeting Suite provides three different tools that can be used together or independently to engage the congregation in an interactive sermon.

- The MeetingBoard is an electronic whiteboard for pastors or Sunday school teachers who want to interact with their computer and annotate over computer-supported sermons.
- The MeetingPad is a wireless pad that allows pastors to preach from anywhere in the sanctuary while being able to interact with and manipulate computer presentations and applications.

The iPanel is designed for those who preach from a podium and present visual materials.
