## SCANNER APPLICATIONS

The ScanPlus 6 LF936 wide format scanner incorporates the latest in imaging technology for high-quality full color scanning and copying. With its full A0/E-size imaging area, it handles large color posters, architectural sketches, detailed maps, drawings and fine art. This scanner offers a cost-effective solution for reprographics, graphic arts, GIS and CAD professionals worldwide. The ScanPlus 6 LF936 scanner opens new possibilities for sign companies, pre-press shops, copy shops, POP/exhibit/display providers, repro houses, mapping, architect and engineer offices.

## HIGH SCANNING SPEEDS

The ScanPlus 6 LF936 base model scanner can scan a typical E-Size monochrome original at 12.0" per second at 400 dpi turbo and a typical E-Size color original at 1.5" per second at 400 dpi turbo. The ScanPlus 6 LF936 Plus model scanner can scan a typical E-Size monochrome original at 12.0" per second at 400 dpi turbo and a typical E-Size color original at 3.0" per second at 400 dpi turbo.

## PRECISION COLOR

A new wide format scanner comes calibrated from the factory, but as time goes by, components and lamps will change the character and affect color output. The unique Precision Color system lets you maintain perfect color results by harmonizing current scanning factors. You can calibrate in the field at any time, so you are always ensured stable and predictable color output.

## IMAGE ENHANCEMENT POWER

The ScanPlus 6 LF936 contains advanced technology for color and monochrome enhancement. The B/W adaptive thresholding works simultaneously on foreground, background, edges and other individual aspects of the original so you produce clean, crisp scans even from poor quality drawings. All processing is embedded in the hardware enabling you to perform powerful image enhancement without overhead and at speeds incomparable to standard software processing.

## COPYING MADE EASY

Connect the ScanPlus 6 LF936 scanner with a large-format printer and you get the perfect large format color and monochrome digital copier. With the scanner's high precision of details and colors, users can enlarge their creations to full display sizes without losing quality. Use JETimage Copy Software with its Precision Color management or other color RIP packages to achieve excellent color-matched output on large-format printers. Special monochrome copy modes, each fitted to specific original types are supported by the scanner's digital processing.

## ADVANCED POWER MANAGEMENT

The ScanPlus 6 LF936 scanner supports Advanced Power Management system that rapidly brings the scanner to its optimal working temperature, after which the temperature is monitored and held at a minimum level ensuring optimal working temperature. The Advanced Power Management system contains advanced features that allows the scanners to power-up automatically before you arrive at work so it is ready to scan when you are.

## ACCURACT LENS ENHANCEMENT TECHNOLOGY (ALE)

With this scanner, GIS professionals, CAD and other specialized markets get a very high grade of precision stability in the scanned image. The Accurate Lens Enhancement Technology (ALE) electronically maintains 0.1% +- pixel precision across any two points of the scan line thus exceeding even the most rigid requirements in the industry today.
